

We are very excited to introduce Solomon. An ET from one of our great donor cows that has proven herself many time over. Solomon is high% and low birth weight. He has the style and structure that is needed in today's cattle world.

We are expecting great things from this young bull and he will have an impact in improving the genetics of the Black Hereford Breed. Solomon is the real deal and can take you to the next level of performance whether you breeding for commercial calves or seed stock.

Semen is \$30.00 per straw volume discount on 20 or more.

certs are \$25.00

To order semen
